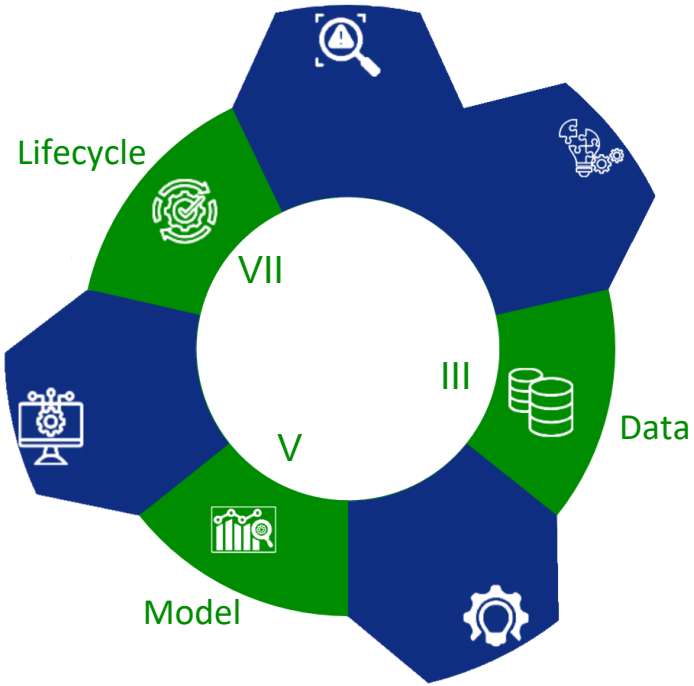
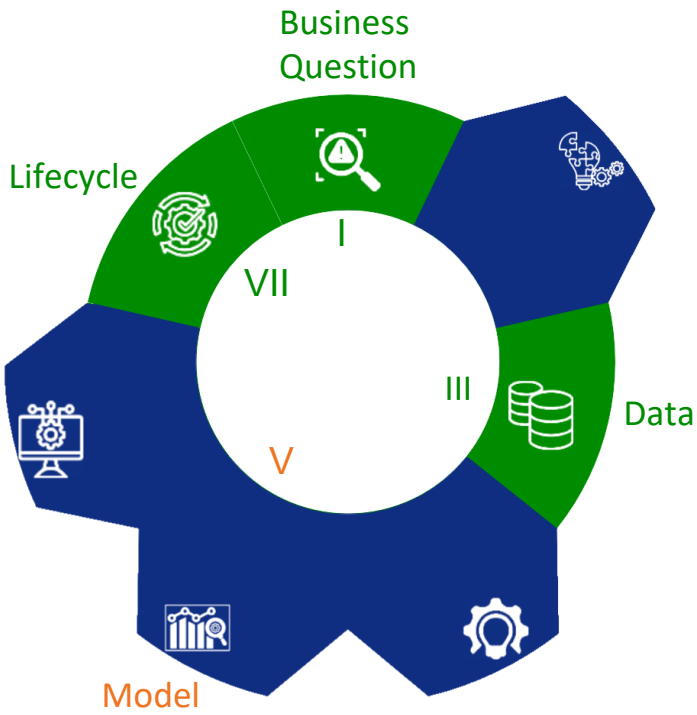
Navigating:

Circle back to the business question and discover the need for a new model





informs. Smarter Decisions for a Better World

Navigating:

Frame the question as an analytics one and develop a new model, but when you take the existing model out of deployment your boss has a different goal in mind that requires different data

Navigating:

Reassess the new business question find that it lends itself to a similar analytics question and thus the same model you had worked on. Acquire and adjust model for new data
